

RAPID-ID/SAF-ID

Mobile Fingerprint Identification

DataWorks Plus' RAPID-ID (also known as SAF-ID) is an extremely fast and accurate software solution that uses advanced fingerprint matching techniques to provide positive identification of an individual. RAPID-ID allows an officer to scan a person's finger on any FBI-approved fingerprint scanner and search a database for a positive match. RAPID-ID searches RISC, state and local AFIS using a variety of fingerprint capture solutions. Search results can also include NCIC, state arrest history, mugshots (when on file), wants and warrants, etc.

Multiple Hardware Options

RAPID-ID differs from other vendor offerings because our software supports fingerprint scanning hardware from numerous hardware manufacturers. With DataWorks Plus, your agency will have total flexibility when selecting the best fingerprint scanner for a wide variety of applications (i.e. one size does not fit all). Your agency won't be tied to a specific hardware vendor.

Take it Anywhere

RAPID-ID is mobile, so you can take it anywhere that positive identification is needed: Roadside Stops, Inmate Movement, Gang Enrollment, Medical Examiner's Office, Court Rooms, Sex Offender Registration, Border Patrol, Event Security, Crime Scene Victims, Serving Warrants, etc.

Scalable

RAPID-ID is scalable to meet system performance requirements for any size agency. From a few hundred matches per second, to hundreds of thousands of matches per second, RAPID-ID can be configured to meet your specific needs and budget.

FBI CJIS Security Compliance

Secure Mobile Data Service (SMDS) from DataWorks Plus on "all-in-one" cellular/Wi-Fi devices provides Mobile Device Management software, two factor authentication, and a customizable shell to ensure that your agency complies with the FBI CJIS Security Policy.

DataWorks Plus
A Leader in Law Enforcement & Criminal Justice Technology

Rapid, Reliable Identification - Anywhere, Anytime

Affordable solution for any size agency.

Manage thousands of mobile devices with single point connection to system.

Transaction Manager – Track the status of each fingerprint search transaction.

Reporting and Statistics – Use a web browser application to track the success of your searches.

Message Queue – Send messages from server to each mobile device.

Automated Software Updates & Status Reports

Fingerprint Enrollment

You may create your own RAPID-ID/SAF-ID database by enrolling fingerprint data from the following: existing live scan device, existing NIST Archive, existing AFIS, single finger device, or flatbed scanner.

Scan with any FBI-Approved Device

RAPID-ID supports multiple FBI-Approved fingerprint scanners. You will be able to select the scanner that best fits the needs of your agency.

Search Multiple Databases

RAPID-ID searches RISC, state and local AFIS, or your RAPID-ID database. Data is transmitted either wirelessly or between a wired USB device and computer.

Immediate Results

In seconds, you'll have an individual's identifying data, including their criminal history, outstanding warrants, sex offender status, parole and probation status, and mugshot (when on file). You can view the results on your MDT, smart phone, or scanner device. All-in-one devices scan fingerprints and display detailed results.
