EVOLUTION Multimodal Biometric Identification

FINGER
PRINTS

FACIAL
RECOGNITION

**Evolution 3
A Series**

Mobile Identification has Evolved...

Multimodal Biometrics

Evolution 3 provides multimodal biometric identification by capturing fingerprints and/or photos (for facial recognition). Evolution 3 searches multiple databases; then detailed results are returned to the device. You will be able to view associated record data, including NCIC, state arrest history, mugshots (when on file), and wants/warrants, etc.

Wireless Communication

Evolution 3 includes an Android smartphone equipped with industry-standard wireless communication methods, including call capability, LTE Internet, Wi-Fi, and GPS capabilities.

FBI FAP-30 Certified

Patented light emitting sensor captures 500 DPI prints. Larger capture area (.8" x 1") with FBI FAP-30 certification increases accuracy. Accurate high-resolution scans in virtually any environment, including indirect or direct sunlight.

FBI CJIS Security Compliance

Secure Mobile Data Service (SMDS) from DataWorks Plus on cellular/Wi-Fi devices provides Mobile Device Management software, two factor authentication, and a customizable shell to ensure that your agency complies with the FBI CJIS Security Policy.

Secure Mobile Data Service (SMDS) to Comply with FBI CJIS Security Policy

A customizable shell and integrated Mobile Device Management (MDM) that allows mobile users and devices to be easily managed in order to comply with the FBI CJIS Security Policy. 2-Factor Authentication requires not only a username and password, but also an additional layer of security (like a fingerprint verification) before allowing access.

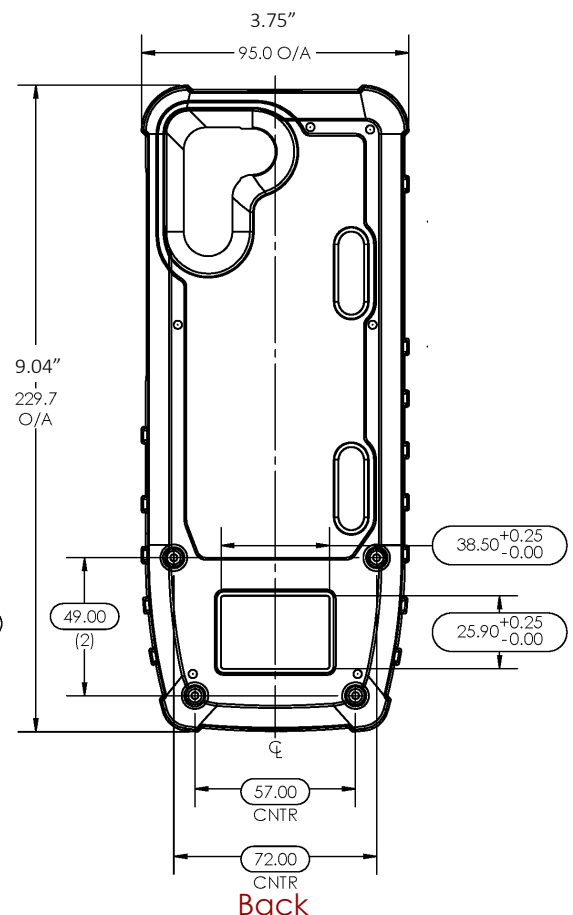

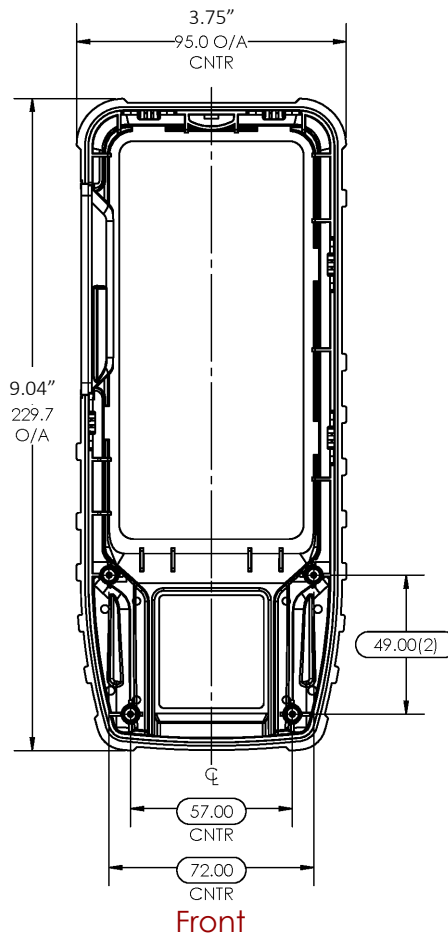

Bundle with DataWorks Plus-provided Verizon M2M data plan for additional savings and ease of use.

Android Smartphone

FAP30 LES Fingerprint Sensor

Live Scan • Mugshot & Criminal Booking • Fingerprint Archive
