Multimodal Biometrics

Evolution 3i provides multimodal biometric identification by capturing fingerprints, photos (for facial recognition), and/or irises, then returning results.

Wireless Communication

Evolution 3i includes an Android smartphone equipped with industry-standard wireless communication methods, including call capability, LTE Internet, Wi-Fi, and GPS capabilities.

FBI FAP-30 Certified

Patented light emitting sensor captures 500 DPI prints. Larger capture area with FBI FAP-30 certification increases accuracy. Accurate high-resolution scans in virtually any environment, including indirect or direct sunlight.

FBI CJIS Security Compliance

Secure Mobile Data Service (SMDS) from DataWorks Plus on cellular/Wi-Fi devices provides Mobile Device Management software, two factor authentication, and a customizable shell to ensure that your agency complies with the FBI CJIS Security Policy.

Secure Mobile Data Service (SMDS) to Comply with FBI CJIS Security Policy

A customizable shell and integrated Mobile Device Management (MDM) that allows mobile users and devices to be easily managed in order to comply with the FBI CJIS Security Policy. 2-Factor Authentication requires not only a username and password, but also an additional layer of security (like a fingerprint verification) before allowing access.

Bundle with DataWorks Plus-provided Verizon M2M data plan for additional savings and ease of use.

Live Scan • Mugshot & Criminal Booking • Fingerprint Archive
Mobile Fingerprint Identification • Crime Scene Digital Asset Management
Multimodal Biometrics (Fingerprint, Iris, Facial) • Applicant Live Scan
Tattoo Matching • Facial Recognition Case Management • Inmate Tracking
